

Solar Electrician

About Us

Certasun is Illinois's premier home solar company. We install solar the roofs of single-family homes throughout the Chicago area. We are 100% locally owned and live in the Chicago and suburban communities we serve.

We are hiring electricians to join our solar installation teams. This is an exciting opportunity to get in at the ground floor of a new business and a rapidly growing solar market.

Responsibilities

- Install electrical service equipment and AC wiring for residential solar PV systems
- Work with the rest of the installation team to complete installations efficiently
- Interconnect solar PV systems with the electric utility's distribution system
- Ensure projects meet NEC, state, and local standards
- Communicate professionally with homeowners
- Meet with inspectors to finalize installations

Requirements

- At least three years of experience as a residential service electrician or one year of experience as a residential solar electrician
- Valid driver's license
- Able to lift 50 pounds, climb ladders, and work on sloped roofs in Chicago weather conditions
- **Authorized to work in the United States**
- **Able to pass drug test and criminal background check**

Benefits

- Competitive compensation package
- Medical insurance coverage
- 401(k) with company matching
- Paid time off and paid holidays
